

### **Moving & Handling Consultation**

ILP has two Moving and Handling Advisors on the team. Both are highly skilled with 35 years experience between them. As they are trainers as well, they are continually updated and refreshed professionally.

Moving and Handling consultations usually take place in the home, with carers present. ILP advisors can assist with safe handling techniques, appropriate to the individual, carer and environment. This may or may not include equipment requests via the Health Service.

ILP advisors are also Trusted Assessors, so their approach is very much person centred, you will be in control of the preferred solution, as you will be informed of all your options.

Consultations can take place at the Shrewsbury head office, where equipment can be tried and tested to check suitability to the client, but more often than not, it would require a visit to the home.

If you would like to have a consultation in your own home or visit Shrewsbury to see a range of equipment solutions, contact ILP on 01743 250 820 to arrange an appointment.
